PROVINCIAL ENVIRONMENTAL & NATURAL RESOURCE EDUCATION PROGRAM

Envirothon NB is an experiential environmental and natural resources problem-solving competition that builds leadership skills for middle and high school students. Teams consist of up to five students from the same school, non-traditional school or youth organization led by advisors (teachers, parents, or volunteers). Resource materials and in-person and virtual workshops are provided to assist teams in their preparation for the provincial competition, May 5&6, 2024.

Getting Involved

- Create an Envirothon NB School Club
- Coach a Team (Teams = 5 students)
- Access Class Presentations, Lesson Plans, Activities
- Connect with Natural Resource Professionals
- Participate in PL opportunities.
- Attend Field Trips and Workshops
- Available to Middle and High Schools

Rewarding Experiences

Emphasizing hands-on learning and real-world application of concepts, Envirothon students can be found getting their hands dirty in a soil pit, measuring the basal area of a forest, collecting macroinvertebrates in a stream to determine water quality, identifying wildlife tracks and/or signs and many other skills and activities used by environmental and natural resource conservation professionals. Students learn directly from these environmental and natural resource professionals, introducing the students to a wide array of higher academic study and careers in the fields of environment, natural resources and conservation.
